Q & A

Q1. Any suggestions before using the clipper?
A1. Firstly, you should wash and dry the pet.
Secondly, if your pet's hair is too long, you should trim your pet's hair with scissors first, comb the hair smoothly, then use clippers to trim your pet.
Thirdly, before and after using the clipper, a little oil should be dripped on the blade for lubrication and maintenance.

Q2. What does the guide comb 3mm, 6mm, 9mm,12mm mean? How to use it?
A2. The size of the blade and the guide combs means the length of the hair that can be left on your cat after a grooming.
For example, if you use the blade with 1.0(mm) and the 12mm guide comb together, that it will leave 1.0mm + 12mm = 13mm long hair on your cat.
If you use the blade with 1.0 (mm) and don't use a guide comb that the hair will be shortened to 1.0mm only.

Q3. What should I do if the battery cannot becharged or turned on?
A3. The battery life depends on the frequency of use and the time of use. If it is not used for a long time, it is recommended to charge the hair clipper at least once every three months to ensure battery life.
