

Product use:

Before using this product, please ensure that the power of the hair comb and the water reservoir are sufficient. According to the following view to complete the steps you can press the spray switch to use the spray function.

1. Charge the hair pulling comb first, and the indicator light will turn green after it is fully charged, as shown in Figure. ①
2. Open the water-filled plug and fill the bottle with water, as shown in Figure. ②
3. Press the spray switch button and the spray port will start spraying while combing your pet's hair, as shown in Figure.

Be sure to use the DC5V adapter to charge.

Caution:

- Be sure to use the DC5V adapter to charge, and please charge it fully for the first time.
- After using the product, use a clean soft cloth or small brush to scrub it clean.
- The product should not be washed with water, use alcohol to disinfect, and pay attention to keep the product dry.
- Storage away from children and pets.
