Instruction manual

Charging Method

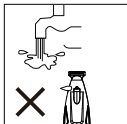

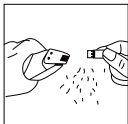

Type-C Charging

*Automatically powers off when fully charged.

*Before use, drip a small amount of lubricant between every few tooth blades. Due to the fast cutting speed of the blade, special oil for the shear must be used. Do not use grease or mixed oil containing kerosene and other solvents at any time.

Product Cleaning Instructions

1. After each use, wipe the machine with a clean cloth, use the cleaning brush to clean the broken hair and dirt between the blades, and then apply lubricating oil to store it.
2. The machine should be stored in a dry and ventilated environment to extend its service life.

Announcements

1. Don't soak the product in water.
2. When the cutter head of the machine is worn and needs to be replaced, please use the original parts.
3. Regular cleaning and maintenance can ensure the high efficiency of the machine and extend the service life.
4. Don't place the machine in a high temperature environment or expose it to direct sunlight.
5. This product is not suitable for use in the bathroom or toilet.
6. Do not modify, disassemble or repair this product by yourself.
7. Please don't use it mix humans and animals.
8. The battery of this machine contains substances that pollute the environment. If you want to discard the machine, please remove the battery and deliver it to the collection point designated by the government.
9. This product is purchased for the first time, please charge it before use! When using a 5V charger outside the standard configuration, be sure to confirm that the current is 1A.

PS: All electrical and electronic products sold in China must be marked with an environmental protection trial period logo. The labeling period (10 years) is the period for which the hazardous or dangerous substances will not leak under normal use of the product, rather than the period for guaranteeing the product's performance.
